Tetra Turn-Key Solutions

We aim to provide full turn-key solutions, collaborating closely with our clients to ensure their needs are met, and we strive to provide a best in class service.

For us Turn-Key means:

- > to follow you during the whole project and identify together all related needs and requirements.
- > to plan the project with due care and select only best-of-breed vendors
- > to deploy the overall network with the support of a local systems integrator (of your choice)
- > to ensure that your people and our support people are fully trained on the whole system to be able to operate and maintain it
- > to support you in operations as long as you need
- > to offer optionally maintenance and operations services.

Our Professional Services portfolio provides a broad spectrum of services including

- > network planning,
- > design,
- > optimization,
- > system integration,
- > applications development and
- > support services.

Our professional services teams are inherently project teams. Every customer job is a project and the goal is to deliver the customer's requirements on time and on budget, while maintaining your own organization's profitability.
